### **TEST REPORT**

Client: Fairview Architectural Pty Ltd

18-20 Donald Street Lithgow NSW 2790 **Test Number** : 22-001592

**Issue Date** : 27/05/2022 **Print Date** : 27/05/2022

Sample Description Clients Ref : "Vitracore G2 with 200x200mm hole"

Rigid panel with centralised hole

Colour: White,Cream,Silver,Black

End Use: Cladding of Buildings

Nominal Composition : Aluminium bonded laminate Nominal Mass per Unit Area/Density : 4.6kg/m2

Nominal Thickness: 4mm

#### TEST REPORT

Client: Fairview Architectural Pty Ltd

18-20 Donald Street Lithgow NSW 2790 **Test Number** : 22-001592 **Issue Date** : 27/05/2022

Print Date : 27/05/2022

These results only apply to the specimen mounted, as described in this report. The result of this fire test may be used to directly assess fire hazard, but it should be recognised that a single test method will not provide a full assessment of fire hazard under all fire conditions.

Ignition is initiated by a pilot flame that is held near, but does not touch the specimen. A material that does not ignite during the standard test may ignite if contacted with a pilot flame during the test.

Each test specimen had an unattached backing of 4.5mm thick fibre reinforced cement board.

Each test specimen was restrained on the exposed face by a layer of galvanised welded square mesh made from wire of nominal diameter 0.8mm and nominal spacing 12mm in both directions and the assembly clamped in four places.
